Sydney, Australia

Professional Summary

A highly motivated frontend developer seeking an internship/junior position. I have a strong passion for improving to be able to build better and more complex websites that provide a great user experience.

Technical Skills

Proficient: HTML5, CSS3 (BEM), JavaScript ES6+, npm, Git, GitHub

Familiar: React, Redux, SASS, Yarn, React dev tools, Tailwind CSS

Education

Bachelor of Engineering (Honours) Mechanical and Mechatronic

University of Technology Sydney

CS50 Introduction to Computer Science

Harvard University

Online

Experience

Elastic Digital

September 2022 - Current

Junior Frontend Developer

- Ensured the swift deployment of online website and email marketing campaigns for clients such as Atlassian, AWS and Intuit through Zift Solutions.
- Assisted in the development of custom websites for clients via HubSpot.
- Documented task progression via Jira.

Personal Projects

Netflix Clone React App

<https://github.com/Chronat0s/Netflix-Clone>

- Used reusable React components and hooks to replicate Netflix's user interface.
- Project cannot be hosted on GitHub pages as threat detection software flags it for "social engineering" therefore the repository to access the code has been provided above.

Wordle-Like Pokemon Guessing Game

<https://chronat0s.github.io/Who-s-That-Pokemon-Game-Project/>

- Takes in guesses (up to 8 guesses) and utilises an API to compare guesses to mystery Pokemon to then display hints to narrow down the identity of the mystery Pokemon.
- Autocomplete dropdown menu integrated.
